

Sadie Levy

sadie.levy.eng@gmail.com ❖ <https://levylevylevy.github.io/portfolio/> ❖ <https://www.linkedin.com/in/sadie-s-l/>

Full-stack SWE and TPM specializing in AI-driven systems, with experience leading cross-functional teams, architecting scalable platforms, designing UI/UX, and delivering high-impact automation.

TECHNICAL SKILLS

Figma, Jira, Confluence, Adobe CC, React, TypeScript, JavaScript, CSS, HTML, .NET, GitHub, VS Code, Azure

RELEVANT EXPERIENCE

JOHN HANCOCK

Full-stack Software Engineer

January 2024 – Present

- ❖ Led the end-to-end design and deployment of an AI tech-for-tech platform, from concept to production rollout.
- ❖ Built and maintained 5 GitHub repositories (frontend, APIs, queue services), 6 TeamCity pipelines, and a SQL database using React, .NET, and Azure services (e.g., OpenAI, Document Intelligence, Content Understanding).
- ❖ Implemented CI/CD; strengthened security with 2FA, increased unit test coverage, and drove user testing.
- ❖ Designed custom document chunking and data correlation logic integrated with GPT-4.1 prompts for text generation.
- ❖ Acted as TPM, driving Agile ceremonies (stand-ups, sprint planning, task delegation, backlog refinement), coordinating cross-functional teams, and communicating status and risks to leadership.
- ❖ Authored technical documentation and led architecture review presentations, demonstrating cost, time, and risk efficiencies and AI model trade-offs, resulting in internal architecture board approval.
- ❖ Reduced cycle time from ~75-225 hours to ~20 minutes (~225-675x improvement), enabling scalable global adoption.
- ❖ Mentored junior engineers on system design, coding best practices, and professional development.
- ❖ Served as *AI Agent Series Lead* and *Ambassador* for the global *AI Community ERG* (3,000+ members), organizing and presenting a speaker series drawing 1,000+ live attendees and driving membership growth by 700+.

SOUNDSPLORE

Head of User Experience

January 2025 – January 2026

UI/UX Designer

May 2023 – December 2024

- ❖ Led UI/UX strategy for a startup client, including Figma mobile app prototypes, user testing, and design QA.
- ❖ Designed and implemented a marketing website using Squarespace and custom HTML/CSS.
- ❖ Translated UX issues into actionable Jira tickets for engineering.

WILLOW

Software Engineer Co-Op

September 2022 – December 2022

- ❖ Built user-centric, responsive web interfaces by translating Figma designs into production-ready React, HTML, and CSS for a fintech startup focused on women and underserved communities.
- ❖ Collaborated with engineers to integrate APIs, debug issues, manage AWS assets, and optimize performance.

TESLA

Technical Program Manager Intern, Energy Firmware/Software

June 2022 – September 2022

- ❖ Served as lead TPM on Tesla's first wind-power project - integrating smart firmware control of turbines within a microgrid plus Tesla Megapack storage. Coordinated internal and external stakeholders. Managed validation, contracts, cost controls, weekly syncs, Confluence documentation, QA and simulation testing, scope, Jira roadmap, code branching, and release strategy. This resulted in the first energy-autonomous island in Greece (Agios Efstratios). The project enables the island to avoid ~3 tons of CO₂ per day.
- ❖ Managed the internal pilot timeline and dependencies for a next-gen charging product. Oversaw firmware development, system testing, hardware readiness/retrofitting, legal/policy compliance, and survey preparation.

EDUCATION

Northeastern University, Boston, MA

2019 – 2023

Bachelor of Science in Computer Engineering, Minor in Computer Science, Honors Program

Additional Experience: Software Design Lead, Generate (2021-22), Test Engineer Co-op, SharkNinja (2021)

2021 Adobe Women in Technology Scholar

2019 – 2020 U.S. House of Representatives Congressional App Challenge Alumni Advisory Board Member
